

PART 3 OF 5 · STARTER KIT

50 AI Prompts That Actually Work

*Copy-paste prompts for scripts, titles,
thumbnails, descriptions and research.*

by the Hidden Hustles HQ team

How to use this library

Each prompt below works in ChatGPT, Claude, or Gemini. **Copy the prompt, replace the [BRACKETS] with your specific details, and paste it.** The prompts are intentionally detailed — vague prompts produce vague output.

Format: each prompt has a name, what it does, and the prompt itself. The text in **amber brackets** is what you customise.

A PROMPTING PRINCIPLE

The best AI output comes from prompts that include three things: who you are (role), what you want (task), and what good looks like (constraints). Most of these prompts do all three so you don't have to think about it.

Niche & Channel Strategy (8 prompts)

Niche Validation Prompt

Tests whether a faceless niche idea has commercial viability before you commit.

I'm considering starting a faceless YouTube channel in the [NICHE] niche. Act as a YouTube strategy consultant. Analyse: 1) the top 5 channels currently in this niche by subscribers, 2) typical video formats and lengths, 3) estimated CPM range for this content, 4) the level of saturation (low/medium/high), 5) what an honest creator would say are the 3 biggest pitfalls. Be brutally honest. If this niche is a bad idea, tell me clearly.

Sub-Niche Generator

Helps you go from "sleep music" to "rain on a cabin roof" — specific enough to win.

I want to start a faceless YouTube channel in the broad niche of [BROAD NICHE]. Generate 15 specific sub-niches within this category. For each sub-niche, give me: 1) the specific name, 2) why it's narrow enough to win, 3) an example video title someone could make in week one, 4) which of the 5 faceless formats (sleep/ambient, explainer, stoic shorts, true crime, tool reviews) fits best.

Competitor Gap Analysis

Finds the angle other creators in your niche are missing.

I'm researching the faceless YouTube niche of [NICHE]. The top channels in this space are [LIST 3-5 CHANNELS BY NAME OR DESCRIPTION]. Identify 5 specific topics or angles these channels are NOT covering well or at all. For each gap, explain why it's a gap and suggest a video title someone could make to fill it.

Channel Description Writer

Generates a channel About description optimised for YouTube SEO.

Write a YouTube channel description for a faceless channel about **[NICHE]**. The channel publishes **[VIDEO COUNT/WEEK]** videos in the **[FORMAT]** format. Target keywords to include naturally: **[3-5 KEYWORDS]**. The description should be 3 paragraphs, 200-300 words total, written in a friendly-but-professional tone, end with a clear CTA to subscribe, and read naturally to humans while incorporating the keywords.

30-Video Content Calendar

Generates a month of video ideas for a specific niche.

I run a faceless YouTube channel in the **[NICHE]** niche. Generate 30 video ideas for the next month. For each video give me: 1) the title (under 60 characters), 2) the format (long-form/Short), 3) what the hook in the first 15 seconds should be, 4) the estimated runtime, 5) why this video would appeal to my target audience of **[AUDIENCE DESCRIPTION]**. Mix evergreen content with timely angles where appropriate.

Trending Topic Hunter

Finds topics within your niche that are trending right now.

I run a faceless YouTube channel in the **[NICHE]** niche. Based on current search trends, news, and cultural conversations as of **[CURRENT MONTH]**, identify 5 specific topics that would resonate with my audience right now. For each: 1) why it's trending, 2) how to angle it for my niche, 3) a sample title, 4) why now is the right time to publish (vs in 3 months when it's stale).

Audience Persona Builder

Creates a detailed reader/viewer profile to inform all your content decisions.

I run a faceless YouTube channel in the **[NICHE]** niche, primarily targeting **[INITIAL AUDIENCE GUESS]**. Build me a detailed audience persona including: demographics, day-to-day life, why they watch this kind of content, what they're hoping to feel after watching, what makes them subscribe vs just watch and leave, what makes them comment, and the 3 things they're most likely to complain about. Make this specific enough that I can ask 'would **[persona name]** watch this?' for every video idea.

Channel Pivot Diagnostic

Diagnoses why a channel isn't growing and recommends a pivot if needed.

I've been running a faceless YouTube channel in [NICHE] for [TIME PERIOD]. Current stats: [SUBSCRIBERS], [TOTAL VIEWS], [AVERAGE VIEWS PER VIDEO], [AVERAGE CTR], [AVERAGE WATCH TIME %]. My top 3 videos by views are [TITLES]. My bottom 3 are [TITLES]. Diagnose: 1) what's working, 2) what's not working, 3) whether the issue is content quality, niche choice, thumbnails, titles, or pacing. If a pivot is needed, recommend the specific shift.

Scripts & Storytelling (12 prompts)

Long-Form Script Writer

Generates a full 1,000-1,500 word YouTube script ready for voiceover.

Write a **[LENGTH IN MINUTES]** minute YouTube video script for a faceless channel in the **[NICHE]** niche. Topic: **[SPECIFIC TOPIC]**. Audience: **[PERSONA DESCRIPTION]**. Required structure: 1) Hook in first 15 seconds that promises a specific payoff, 2) 3-5 main points each with clear evidence or examples, 3) one moment of unexpected angle or contrarian take, 4) a clear close with a CTA to subscribe. Tone: **[TONE — e.g. calm and authoritative, energetic and curious]**. Avoid generic intros like "hey guys, welcome back to the channel." Get straight into substance.

Hook Generator (15 variations)

Generates 15 different first-15-seconds hooks for the same video.

I'm making a YouTube video about **[TOPIC]** for a faceless channel in **[NICHE]**. Generate 15 different opening hooks (15-30 seconds each) for the same video. Each hook should use a different psychological pattern: pattern interrupt, contrarian claim, surprising statistic, personal anecdote, specific failure story, what-if scenario, problem identification, etc. Number them and label each with which pattern it uses.

Script Improver

Takes a draft script and identifies where retention will drop.

Here's a YouTube script I'm working on: **[PASTE SCRIPT]** Act as a YouTube retention analyst. Read it from the viewer's perspective and identify: 1) the 3 moments where viewers are most likely to drop off, 2) why (boring transition, unclear value, repetition, etc.), 3) specific suggested rewrites for each. Then identify the 3 strongest moments and explain why they work.

Listicle Script Generator

Generates a top-X listicle script with a strong opening and a payoff structure.

Write a YouTube listicle script for a faceless channel about **[TOPIC]** with **[NUMBER]** items. Each item should: have a name/title, explain what it is in 30-45 seconds, include one specific example, and end with a transition to the next. Open with a strong hook that promises why this list is different from every other "top X" video. Close with a callback to the opening promise.

Sleep / Ambient Narration

Generates calm narration for sleep, meditation, or ambient channels.

Write a **[LENGTH]** minute calm narration for a sleep / meditation YouTube video about **[TOPIC]**. The narration should be: paced slowly (assume 110-130 words per minute spoken), use simple soothing vocabulary, avoid sharp consonants or jarring word choices, include natural pauses **[marked with brackets]**, guide the listener toward relaxation. Tone: gentle, unhurried, reassuring. Avoid clichés like 'imagine you're on a beach' — find a more specific and original anchor for the visualisation.

Storytelling Hook Pattern

Generates a story-driven opening for narrative content.

I'm making a faceless YouTube video about **[TOPIC]**. Write a 60-90 second opening that uses the in-medias-res story pattern: start in the middle of a specific moment, build curiosity about how we got there, then promise to explain over the next **[LENGTH]**. The story moment should be: specific, sensory (what was seen/heard/felt), and emotionally hooked. Avoid generic "have you ever wondered" openings.

Explainer Video Outline

Builds a clear, retention-friendly outline for educational content.

Build an outline for a **[LENGTH]** minute YouTube explainer video about **[COMPLEX TOPIC]** for an audience of **[AUDIENCE LEVEL — beginners/intermediate/advanced]**. The outline should include: 1) the one core question the video answers, 2) the prerequisite knowledge the viewer needs (and how to handle if they don't have it), 3) 3-5 sub-questions building to the answer, 4) one concrete example for each sub-question, 5) the visual that should accompany each section, 6) the close.

Voiceover-Friendly Script Cleaner

Rewrites a script so it sounds natural when read aloud by AI voice tools.

Take this script and rewrite it specifically for AI voiceover (ElevenLabs / Murf / PlayHT): **[PASTE SCRIPT]** The rewrite should: 1) break long sentences into shorter spoken-friendly ones, 2) replace words that AI voices typically mispronounce (technical jargon, unusual names) with phonetic spellings or simpler alternatives, 3) add **[pause]** markers where natural breath breaks should occur, 4) replace bracketed acronyms with their spoken form, 5) ensure no sentence is longer than 25 words.

Two-Voice Dialogue Format

Generates a dialogue between two AI voices for explainer content.

Write a 5-7 minute YouTube dialogue between two characters discussing **[TOPIC]**. Character A: **[DESCRIPTION — e.g. curious beginner asking questions]**. Character B: **[DESCRIPTION — e.g. knowledgeable mentor with surprising opinions]**. The dialogue should: feel like a real conversation, include moments of disagreement or surprise, build understanding progressively, end with both characters having a specific takeaway. Each line should be clearly labeled A: or B: for voiceover production.

Counter-Argument Builder

Generates the strongest case against your own argument (so you can address it).

I'm making a YouTube video arguing that [YOUR THESIS]. Before I publish it, steelman the opposing view. Give me: 1) the 3 strongest objections someone could raise, 2) the specific evidence or examples they'd use, 3) the emotional appeal they'd make, 4) the kind of person most likely to disagree and why. Don't make weak straw-man counter-arguments — make these as strong as possible so I can address them properly in the video.

B-Roll Suggestion Generator

Suggests specific visuals for each section of a script.

Here's my YouTube script: [PASTE SCRIPT] For each paragraph, suggest 2-3 specific b-roll visuals I could use. Be specific — not 'show a person typing' but 'close-up of hands on a mechanical keyboard, slightly dim lighting, focus pulled to one keycap.' Where the script makes an abstract point, suggest a concrete visual metaphor that translates it. Where stock footage won't work, note that the section may need AI generation or original footage.

Channel Voice Calibrator

Helps you develop a consistent tone of voice across all your videos.

I'm developing the editorial voice for my faceless YouTube channel about [NICHE]. Help me define it precisely. Generate: 1) 3 adjectives that describe the voice (specific, not vague — "contrarian" not "unique"), 2) 3 things this voice never does (e.g. "never promises overnight results"), 3) 3 phrases this voice would use and 3 it never would, 4) one similar creator or writer this voice borrows from, 5) a sample 100-word paragraph in this voice about a generic topic so I can hear what it sounds like.

Titles, Thumbnails & Descriptions (12 prompts)

Title A/B Generator

Generates 20 title variants for the same video for A/B testing.

I'm publishing a YouTube video about **[TOPIC]**. The core promise is **[WHAT THE VIDEO DELIVERS]**. Generate 20 different title variants, each under 60 characters. Mix these patterns: number-led, question-led, contrarian, before/after, mystery, urgency, specificity, named-entity. Rate each one from 1-10 for click-through potential and explain your top 3 picks.

Thumbnail Concept Generator

Generates 5 different visual concepts for a YouTube thumbnail.

I need a thumbnail for a YouTube video titled "**[TITLE]**" in the **[NICHE]** niche. Generate 5 different thumbnail concepts. For each, describe: 1) the main visual focus, 2) the text overlay (max 4 words), 3) the colour palette, 4) the emotional hook the thumbnail creates, 5) which audience segment it appeals to most. Lean visual / striking, not cluttered. Assume I'm making this in Canva or Figma.

Description Writer (SEO-Optimised)

Generates a YouTube video description that ranks and converts.

Write a YouTube video description for a video titled "**[TITLE]**" in the **[NICHE]** niche. The video covers **[BRIEF SUMMARY]**. Required structure: 1) compelling first sentence with the primary keyword, 2) 2-3 paragraphs (200+ words total) explaining what the viewer will learn, 3) a chapter list with timestamps (assume the video has **[NUMBER]** sections at roughly equal lengths in a **[TOTAL LENGTH]** video), 4) related videos section with placeholders, 5) channel CTA, 6) social links placeholder, 7) 5-10 relevant hashtags at the end. Naturally include these keywords: **[LIST 3-5 KEYWORDS]**.

Title Polisher

Takes a working draft title and makes it stronger.

My current YouTube title is: "[CURRENT TITLE]". The video is about [TOPIC]. Make it stronger. Show me: 1) what's weak about the current title, 2) 3 stronger versions with reasoning, 3) which psychological pattern each version uses, 4) which one I should A/B test against the original.

Tag Generator

Generates relevant tags for a video for YouTube's search algorithm.

Generate YouTube tags for a video titled "[TITLE]" about [TOPIC] in the [NICHE] niche. Give me: 1) 5 primary tags (the most directly relevant), 2) 5 secondary tags (broader category tags), 3) 5 long-tail tags (specific phrases), 4) 5 audience-intent tags (what someone searching for this might also search for). Format as a comma-separated list ready to paste into YouTube Studio.

Chapter Marker Writer

Generates timestamped chapter markers for a video.

I'm publishing a [LENGTH] minute YouTube video about [TOPIC]. The video covers these main sections: [LIST SECTIONS]. Generate 5-8 chapter markers with timestamps. Each chapter title should be: descriptive (not vague), under 50 characters, optimised for YouTube SEO where natural, and curiosity-inducing enough to encourage skip-jumping. Format ready to paste into description: '00:00 — Chapter title'.

End Screen Suggestion

Generates end screen and pinned comment suggestions.

For a YouTube video about [TOPIC], generate: 1) a 15-second end screen script that asks for a subscribe, 2) a 30-second end screen alternative that recommends a specific next video, 3) a pinned comment that invites engagement (a question viewers want to answer), 4) a community post draft that promotes this video to existing subscribers without sounding desperate.

Title Style Match

Reverse-engineers the title patterns of a successful channel.

Here are 10 video titles from a successful channel in my niche: **[PASTE TITLES]**. Analyse: 1) the common structural patterns, 2) the emotional triggers each uses, 3) the average title length, 4) the use of numbers, brackets, capitalisation, 5) what they all promise the viewer. Then write me 5 title templates I can fill in for my own videos that use the same patterns without copying directly.

Thumbnail Text Generator

Generates the punchy text overlay for thumbnails.

I need thumbnail text (3-5 words max) for a video titled "**[TITLE]**". The text should: be readable on mobile at small size, create curiosity, work with the visual concept of **[VISUAL DESCRIPTION]**, complement (not repeat) the title. Generate 10 variants, ranked by likely CTR. Number them and explain the top 3.

Click-Through Rate Diagnoser

Diagnoses why a thumbnail/title combo has low CTR.

I have a YouTube video with the title "**[TITLE]**" and thumbnail **[DESCRIBE OR LINK]**. Current CTR after **[VIEWS]** views is **[%]**. Niche average CTR is typically 4-6%. Diagnose: 1) is the issue title, thumbnail, or both, 2) what specifically is failing, 3) what would you change first, 4) what to A/B test against. Be specific.

Multilingual Title Generator

Generates translated titles + descriptions for multilingual reach.

Translate this YouTube title and description into **[LANGUAGE]**: Title: "**[TITLE]**". Description: "**[DESCRIPTION]**". The translation should: 1) preserve the click-through hook, not just literal meaning, 2) adapt cultural references where needed, 3) maintain the keyword optimisation in the target language, 4) feel natural to a native speaker. Note any phrases that don't translate well and what you adapted.

Shorts Title Optimiser

Generates titles specifically for YouTube Shorts.

I'm publishing a YouTube Short about **[TOPIC]**. Generate 10 Shorts-optimised titles. Each should: be under 100 characters, work as a hook in the first 1 second, signal the payoff clearly, and not look like a click-bait listicle. Mix patterns: declarative, question, before/after, contrarian, specific stat. Number them.

Production & Workflow (10 prompts)

Visual Style Guide Generator

Creates a consistent visual identity for your channel.

I'm building the visual identity for a faceless YouTube channel about **[NICHE]**. Generate a style guide including: 1) a colour palette (5 colours with hex codes and emotional reasoning), 2) typography recommendations (2 fonts — display + body — with reasoning), 3) thumbnail layout template description, 4) intro/outro visual treatment (5-10 second animations), 5) lower-third design notes, 6) consistency rules (what to keep the same across every video).

Production Schedule Builder

Generates a realistic weekly production schedule.

I want to publish **[VIDEOS PER WEEK]** long-form videos and **[SHORTS PER WEEK]** Shorts on my faceless YouTube channel. I have **[HOURS PER WEEK]** hours to spend on this. Build me a realistic weekly schedule that includes: scripting, voiceover, editing, thumbnail design, publishing, and analytics review. Identify which days I'd batch tasks. Tell me where in the week I'm most likely to fall behind and what to cut if I do.

Voiceover Direction Writer

Writes specific voice direction for AI voice tools.

I'm generating voiceover for this paragraph using **[TOOL — ElevenLabs/Murf/PlayHT]**: **[PASTE PARAGRAPH]** Write specific direction for the AI voice: 1) overall tone (calm/energetic/authoritative/etc.), 2) pacing (slow/medium/fast — words per minute target), 3) where to emphasise specific words, 4) where to pause, 5) what emotion to lean into. Format as instructions I can paste into the tool's direction field.

Editing Checklist Generator

Generates a per-video editing checklist tailored to your format.

Generate an editing checklist for a faceless YouTube video in the **[FORMAT — sleep/explainer/listicle/etc.]** format. The checklist should include: pre-edit (script review, voiceover check), main edit (cuts, transitions, b-roll, music), polish (colour, audio levels, captions), and final review (thumbnail, title, description, end screen). Make it scannable — bullet points, not prose. About 25-30 items total.

Asset Library Builder

Plans the reusable assets you should build once.

I'm starting a faceless YouTube channel about **[NICHE]**. To save time long-term, what assets should I build once and reuse across every video? Generate a list of: 1) reusable visuals (intro animation, lower thirds, transitions), 2) reusable audio (sound effects, music cues, intro music), 3) reusable templates (thumbnail templates, description templates, script templates), 4) brand assets (logo variations, channel art, end screen). For each, note where to build it (Canva, DaVinci, ElevenLabs, etc.).

Render Settings Advisor

Recommends export settings for YouTube uploads.

I'm rendering a **[DURATION]** minute YouTube video in DaVinci Resolve. The video is **[DESCRIPTION — talking-head, animated, ambient, etc.]** at **[RESOLUTION]** resolution. Recommend the optimal export settings for YouTube: container, codec, bitrate, audio settings, frame rate. Explain any tradeoffs (file size vs quality vs upload time). Note any DaVinci-specific quirks I should know about.

Batch Production Planner

Plans how to batch-produce 5+ videos efficiently in one session.

I want to batch-produce 5 YouTube videos in one production session to save time. Each video is about a different topic in **[NICHE]**. The 5 topics are: **[LIST TOPICS]**. Plan: 1) the optimal order to script them, 2) the optimal order to record voiceover, 3) which assets can be reused across all 5, 4) which editing tasks to batch (e.g., all thumbnails together), 5) realistic time estimate per video and total session. Identify the bottleneck.

Repurposing Strategy

Turns one long-form video into multiple content pieces.

I just published a **[LENGTH]** minute YouTube video titled "**[TITLE]**" about **[TOPIC]**.
Generate a repurposing plan to turn this into: 1) 3-5 YouTube Shorts (specify timestamps to clip), 2) a Twitter/X thread (10-15 tweets), 3) a LinkedIn post (300 words), 4) an Instagram carousel (8 slides), 5) a Reddit post (with which subreddit and how to position it to add value not spam). For each, give me the actual content, not just a description of what it would be.

Quality Control Checklist

Pre-publish checklist to catch common mistakes.

Generate a pre-publish quality control checklist for a faceless YouTube video. Include items for: 1) script (no typos, no factual errors, no AI artefacts like 'as an AI'), 2) voiceover (audio levels, no mouth clicks for human voice, correct pronunciation), 3) visuals (no copyrighted material, consistent style, no rendering glitches), 4) metadata (title, description, tags, thumbnail, end screen, cards), 5) compliance (AI disclosure ticked if applicable, monetisation eligible). About 25 items, scannable.

Workflow Bottleneck Diagnoser

Identifies why your production time per video is too high.

I currently take **[HOURS]** hours to produce one **[LENGTH]** minute faceless YouTube video. My production workflow is: **[DESCRIBE YOUR STEPS]**. Industry benchmark for this format and length is roughly **[BENCHMARK HOURS]**. Diagnose: 1) where I'm spending too much time, 2) which step has the highest leverage to speed up, 3) specific changes I could make this week, 4) whether the issue is tool choice, skill, or workflow design.

Growth & Analysis (8 prompts)

First 100 Subscribers Strategy

Generates an actionable strategy for getting to 100 subscribers.

I have a faceless YouTube channel in **[NICHE]** with **[CURRENT SUBSCRIBER COUNT]** subscribers. I want to get to 100 subscribers in **[TIMEFRAME]**. Without using paid ads or buying subscribers, generate a specific strategy including: 1) what content to publish and how often, 2) where to share each video, 3) which communities (Reddit, Discord, niche forums) to engage in (and how to add value before promoting), 4) what NOT to do (the desperate-creator mistakes), 5) realistic weekly subscriber targets.

Analytics Interpreter

Reads your YouTube analytics and tells you what to do.

Here are my YouTube analytics for the last 30 days: **[PASTE OR DESCRIBE: total views, watch hours, subscribers gained, average view duration, average percentage viewed, click-through rate, top 5 videos, bottom 5 videos]**. Interpret: 1) what's working, 2) what's not working, 3) the single highest-leverage change to make next week, 4) what to ignore even though it looks important, 5) what KPI I should be optimising for at my current stage.

Comment Engagement Strategy

Plans how to use comments to drive engagement.

I want to use YouTube comments more strategically on my channel about **[NICHE]**. Generate: 1) 10 pinned comment templates I could use (questions that drive replies), 2) a strategy for responding to viewer comments (which to reply to, which to ignore), 3) how to handle negative or trolling comments, 4) how to use comments to identify future video topics, 5) a 'community post' calendar for once I unlock that feature.

Niche Authority Builder

Builds a plan to become a recognised voice in your niche.

I want to become a recognised voice in the [NICHE] niche over the next 12 months. Build a strategy including: 1) the 5 platforms beyond YouTube I should be active on, 2) the kind of content to publish on each (not just repurposed YouTube content), 3) which 5-10 creators in the niche to engage with consistently and how, 4) one specific 'authority asset' to build (research piece, definitive guide, etc.), 5) what to measure each month to know if it's working.

Collaboration Pitch Writer

Writes outreach emails to other creators for collaborations.

I run a small faceless YouTube channel ([CURRENT STATS]) in [NICHE]. I want to pitch [TARGET CREATOR — DESCRIPTION] for a collaboration. Write the pitch email. Required: 1) specific, not generic — references actual videos of theirs, 2) clear value proposition for them (why collaborating with me helps THEM), 3) one specific collaboration idea (not a vague 'we should work together'), 4) realistic — doesn't ask for too much, 5) easy to reply to even with a no. Under 150 words.

Monetisation Diversification Plan

Plans income streams beyond YouTube ad revenue.

I run a faceless YouTube channel in [NICHE] with [STATS]. Beyond YouTube ad revenue, what monetisation streams should I build? Generate: 1) 5 specific options ordered by realistic difficulty for my stage, 2) for each, the realistic monthly revenue range at my current and 2x-current channel size, 3) the time investment to set up, 4) which one to start with and why, 5) which ones to deliberately NOT build (because they distract from channel growth).

Demonetisation Risk Auditor

Audits a video before publishing for monetisation risk.

I'm about to publish a video titled "[TITLE]" covering [TOPIC]. The script includes [BRIEF SUMMARY OR KEY PHRASES]. Audit it for YouTube monetisation risk: 1) any topics that trigger limited ads, 2) any words/phrases in the title or description that flag the algorithm, 3) any visuals/audio that might cause issues, 4) suggested edits to keep the content's spirit while staying advertiser-friendly, 5) whether the video should be marked 'made for kids' (almost certainly no for this niche, but confirm).

Long-Term Plateau Diagnoser

Diagnoses why a channel has stopped growing.

My YouTube channel in [NICHE] has plateaued. Stats: [SUBSCRIBERS], [VIEWS PER MONTH FOR LAST 3 MONTHS], [TOP VIDEOS]. I've been publishing [FREQUENCY] for [DURATION]. Diagnose: 1) is this a real plateau or just slow growth, 2) the 3 most likely structural reasons (niche saturation, content quality, format choice, etc.), 3) what to test in the next 30 days, 4) when I'd know if the test worked, 5) under what circumstances I should consider pivoting the channel entirely.

Final notes

These 50 prompts cover roughly 80% of what you'll need across a typical faceless YouTube channel workflow. The remaining 20% is specific to your particular niche and style — and the best prompts you'll ever use are the ones you write yourself after testing what works.

The compound benefit: save your best customised prompts in a Notion page or ChatGPT custom GPT. After 3 months, you'll have a personal library that produces better output than any generic prompt pack ever could.

A NOTE ON THESE PROMPTS

I update this prompt library every 3 months as the AI models change. If you're reading this more than 6 months after download, check hiddenhustleshq.com/prompts for the latest version.
